Subject: 572Bs wanted

I am looking for a new pair of 572B tubes.

Would prefer American manufactured, but might consider other.

>Berkeley cyclotron is based on a 100 kW arc xmtr.

I'm not surprised. Most particle accelerators are basically monstro RF oscillators. I've seen the Berkeley cyclotron at UCLA. It's in Kinsey Hall and they let the grad students operate it, or at least they used to. Little bitty thing. Surprising. Now they're trying to figure out where they're going to go after the supercollider magnitude of these things, when the machines are too large to fit on the Earth.

If the HT-37 is in excellent condition, it's a fairly good price as I've seen these fetch \$150. Otherwise, it's right in the ballpark. This is a really nice sounding rig when aligned and generally tweaked up.

Subject: Prices New, 1978

I was paging through a magazine I had in my desk entitled

Popular Electronics Communications Handbook, 1978

It is a comprehensive guide to comm equipment.

Get some of these prices:

Rex

00ps, that is "Rec"

Collins 51S1 \$4770
Collins 651S1 \$10,257 (ouch)
Drake DSR-2 \$3200
Drake SPR-4 \$699
Dymek DR33 \$1500
National HRO 600/602 \$4990
National HRO 500 \$3000

Ham

Collins KWM2A \$4427
Drake R4C \$699 T-x4C \$699
National NCX-1000 \$1600

Marine

Collins MR-201 \$6146

Drake TRM \$1565 (we still use these at work!!)

Motorola Triton 24 SSB \$2880

CB

Browning Golden Eagle \$895

Cornell-Dubilier Mark 20 \$330

Motorola 4025 \$230

Tram D-201-A \$995 (ouch)

All of these rigs were pretty far off at \$2.30/hr :-)
